

Science of Cellular Communication

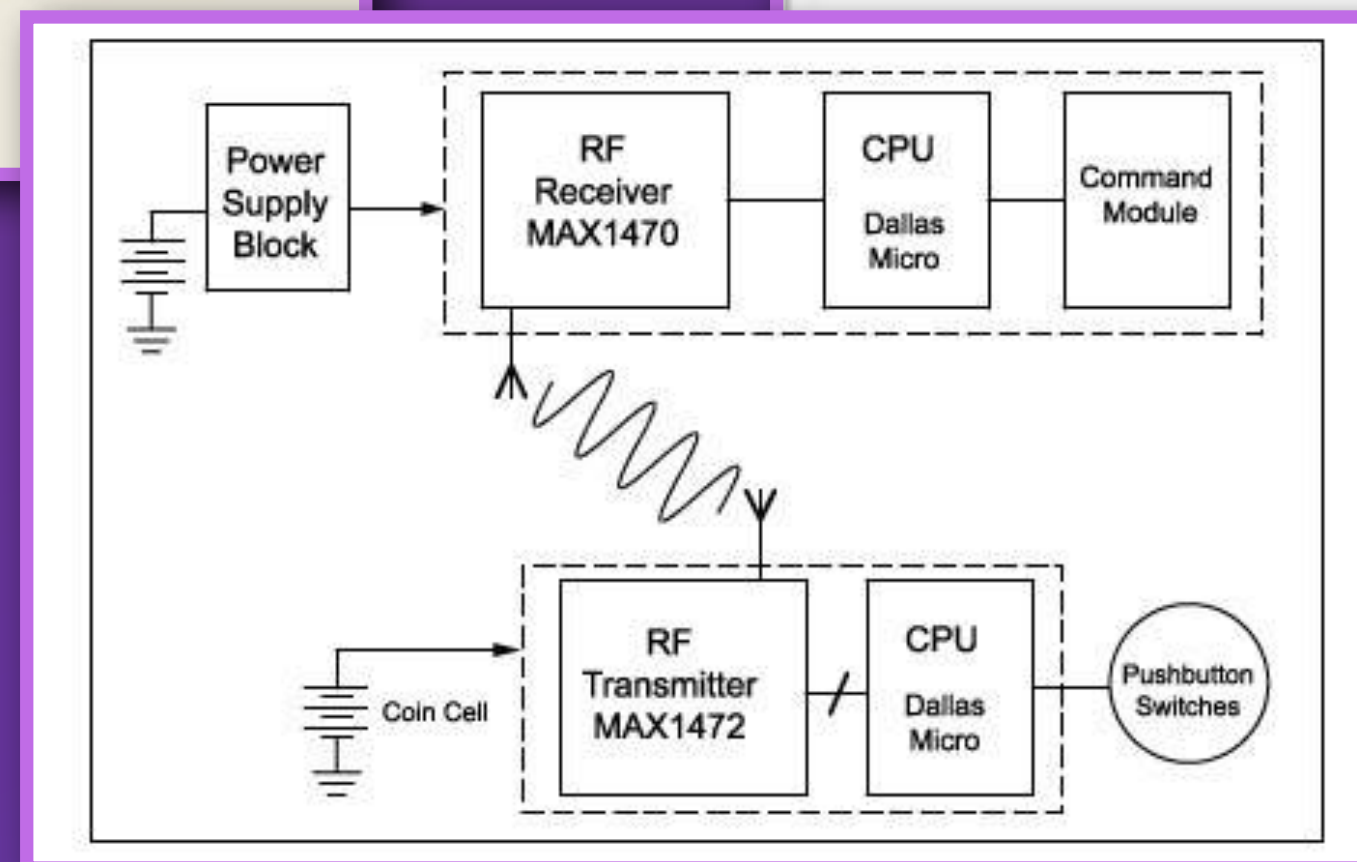

Kaznacheyev also found the converse, that healthy cultures could “walk back” a diseased one into a state of health.

These experiments were widely replicated in the USSR and also in Europe and published in peer reviewed journals.

The take away message is that disease can be initiated simply by the transfer of frequencies from one source to another: one cell culture to another or one person to another.

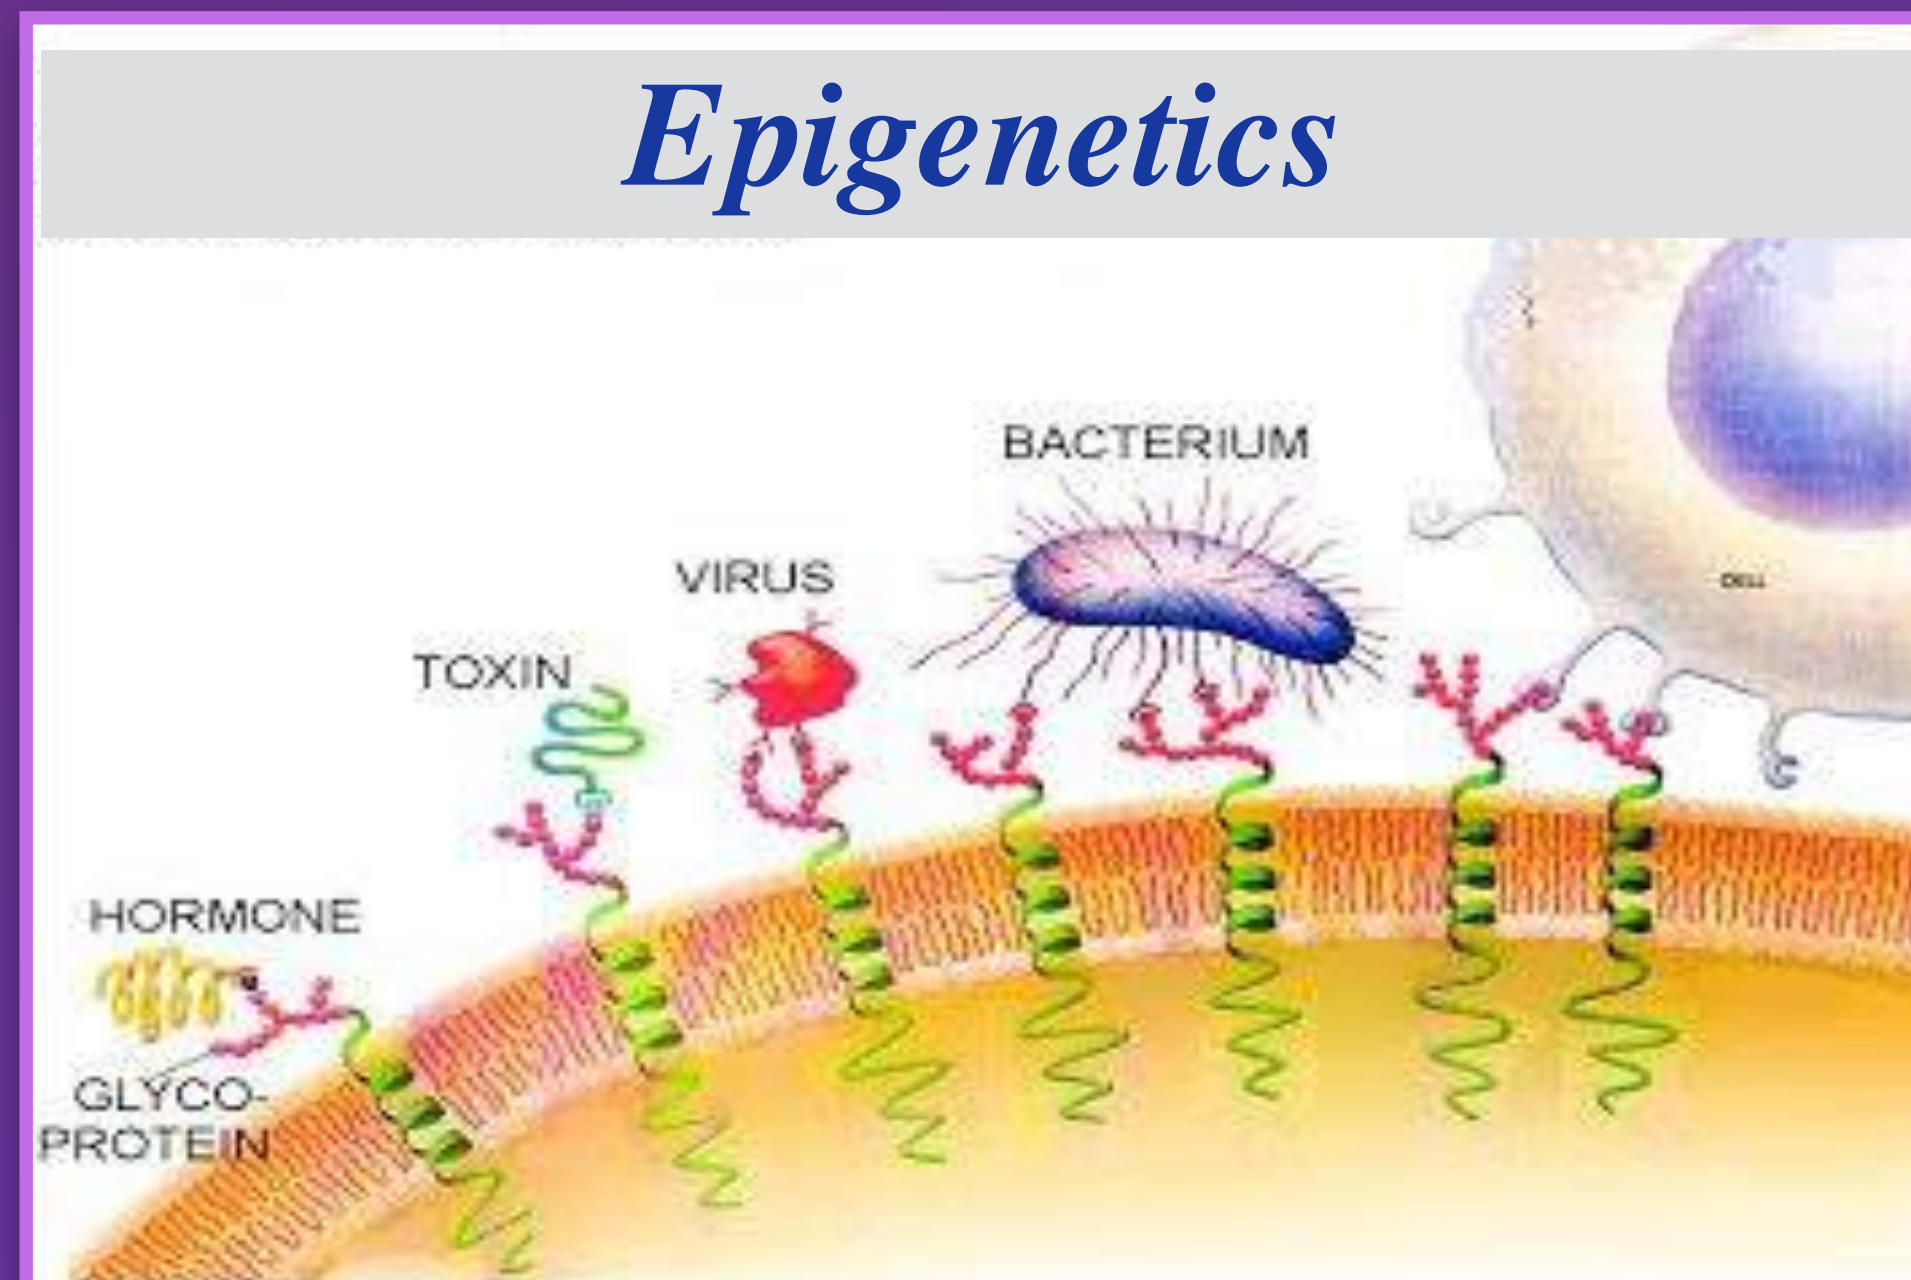

Your Key Fob Works Like a Cell

The key fob is the transmitter which sends a signal to a receiver in the door.

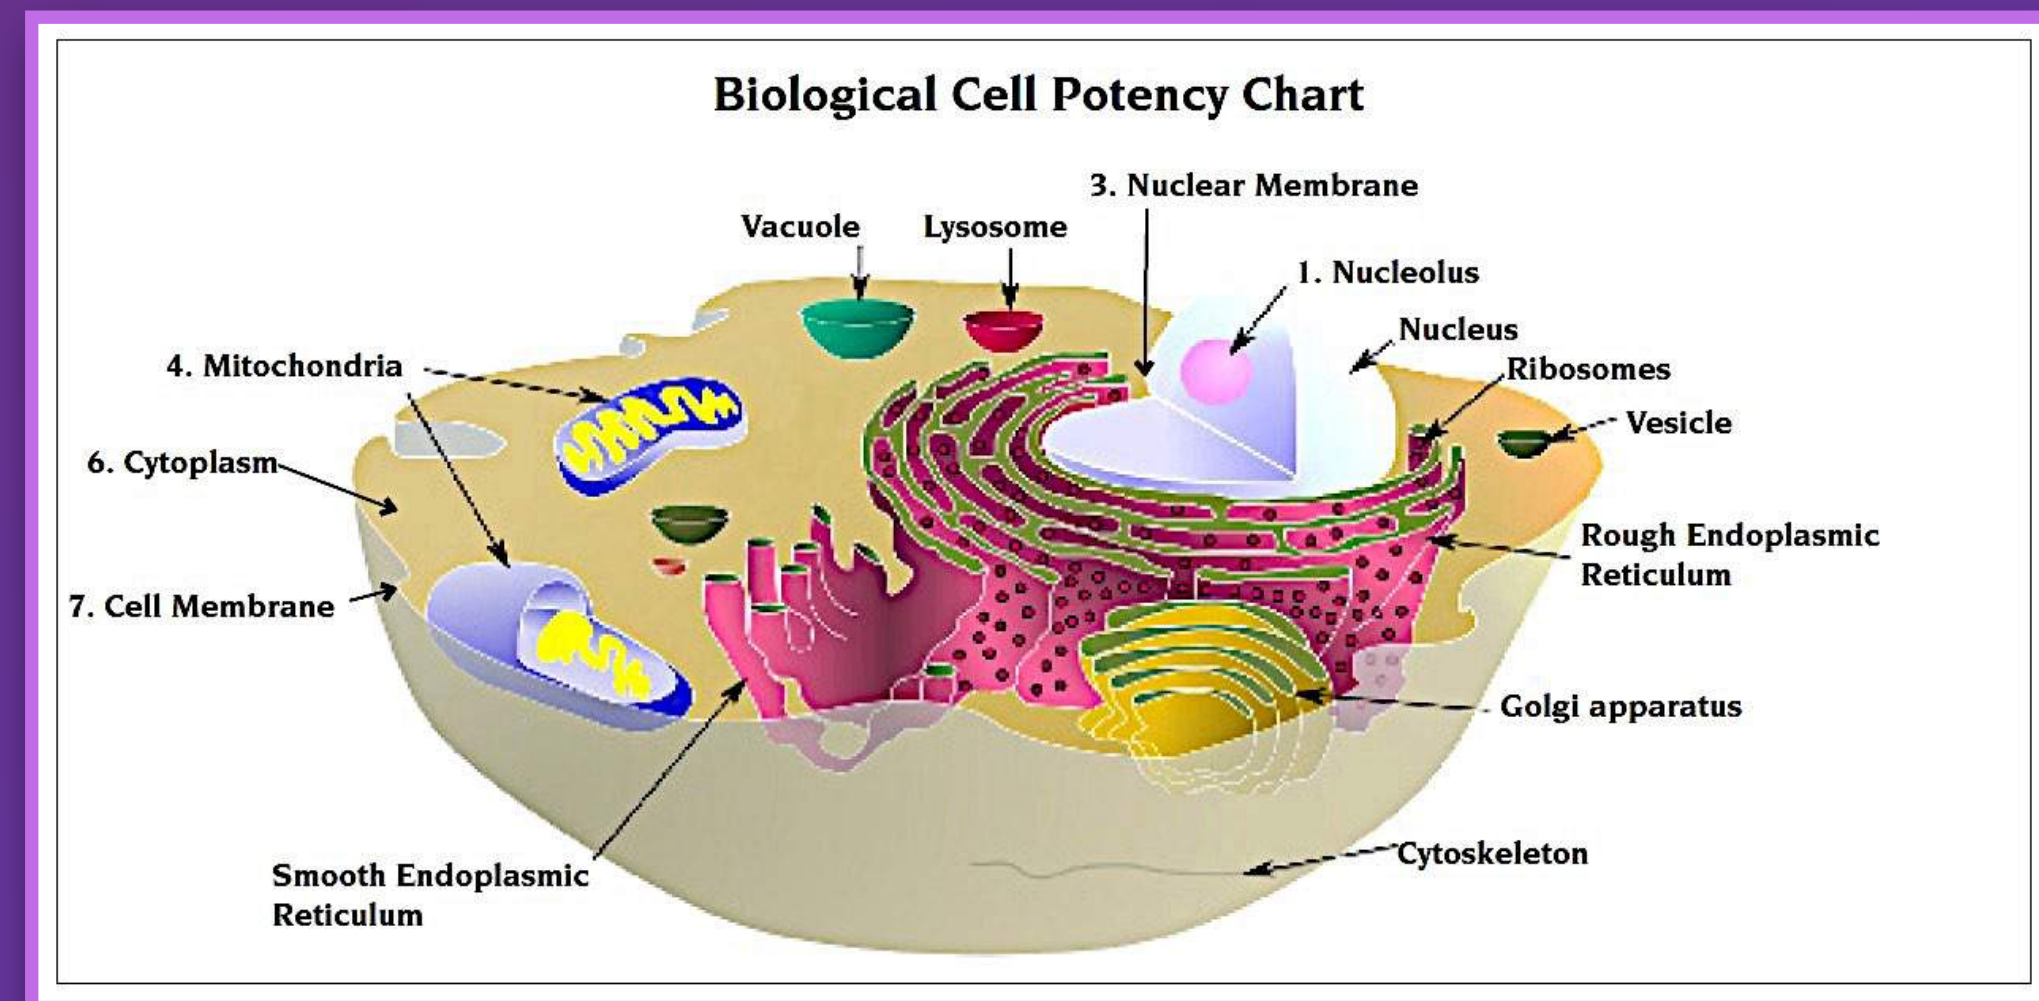

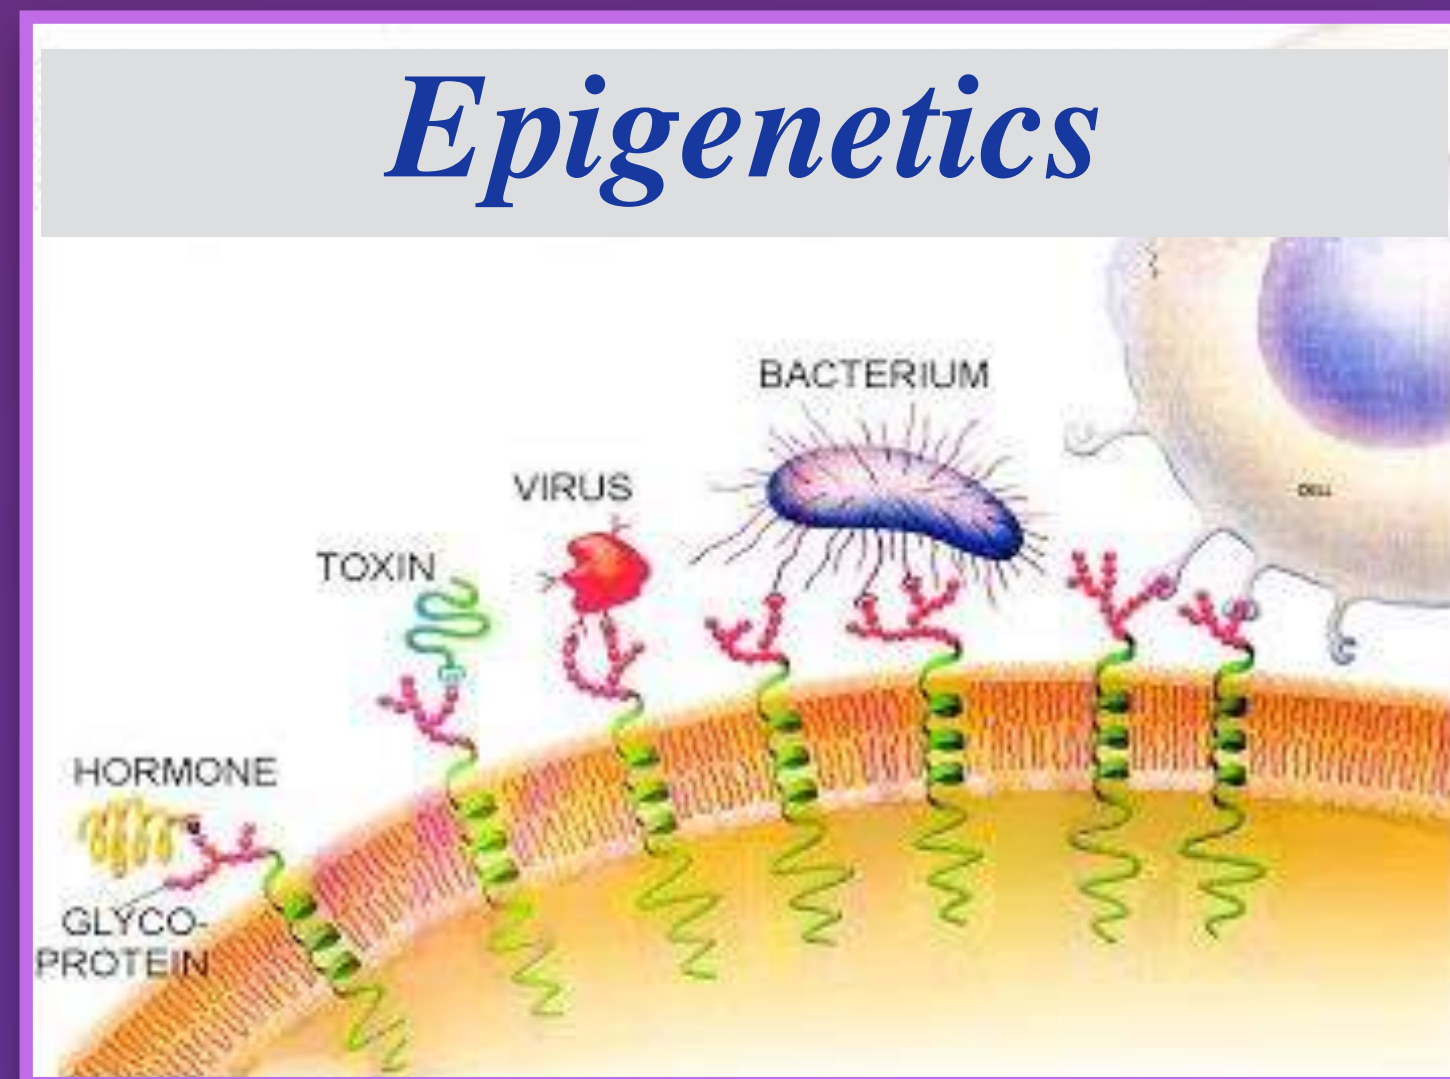

How Does Energy Medicine Work?

Dr. Bruce Lipton's research in the 1960s documented that the genes **DO NOT** control cell function. Environmental factors (EMFs) affect the receptors on the cell membrane which stimulate physiological functions within cells.

Internal Cell Organelles

When stimulated, the internal organelles react. Mitochondria produce energy; they also signal and coordinate the function of all the other components.

Endoplasmic reticulum processes proteins. Ribosomes synthesize the proteins. Golgi apparatus packages the protein for export.

Frequencies Used in Healing

Science of Frequencies in Healing

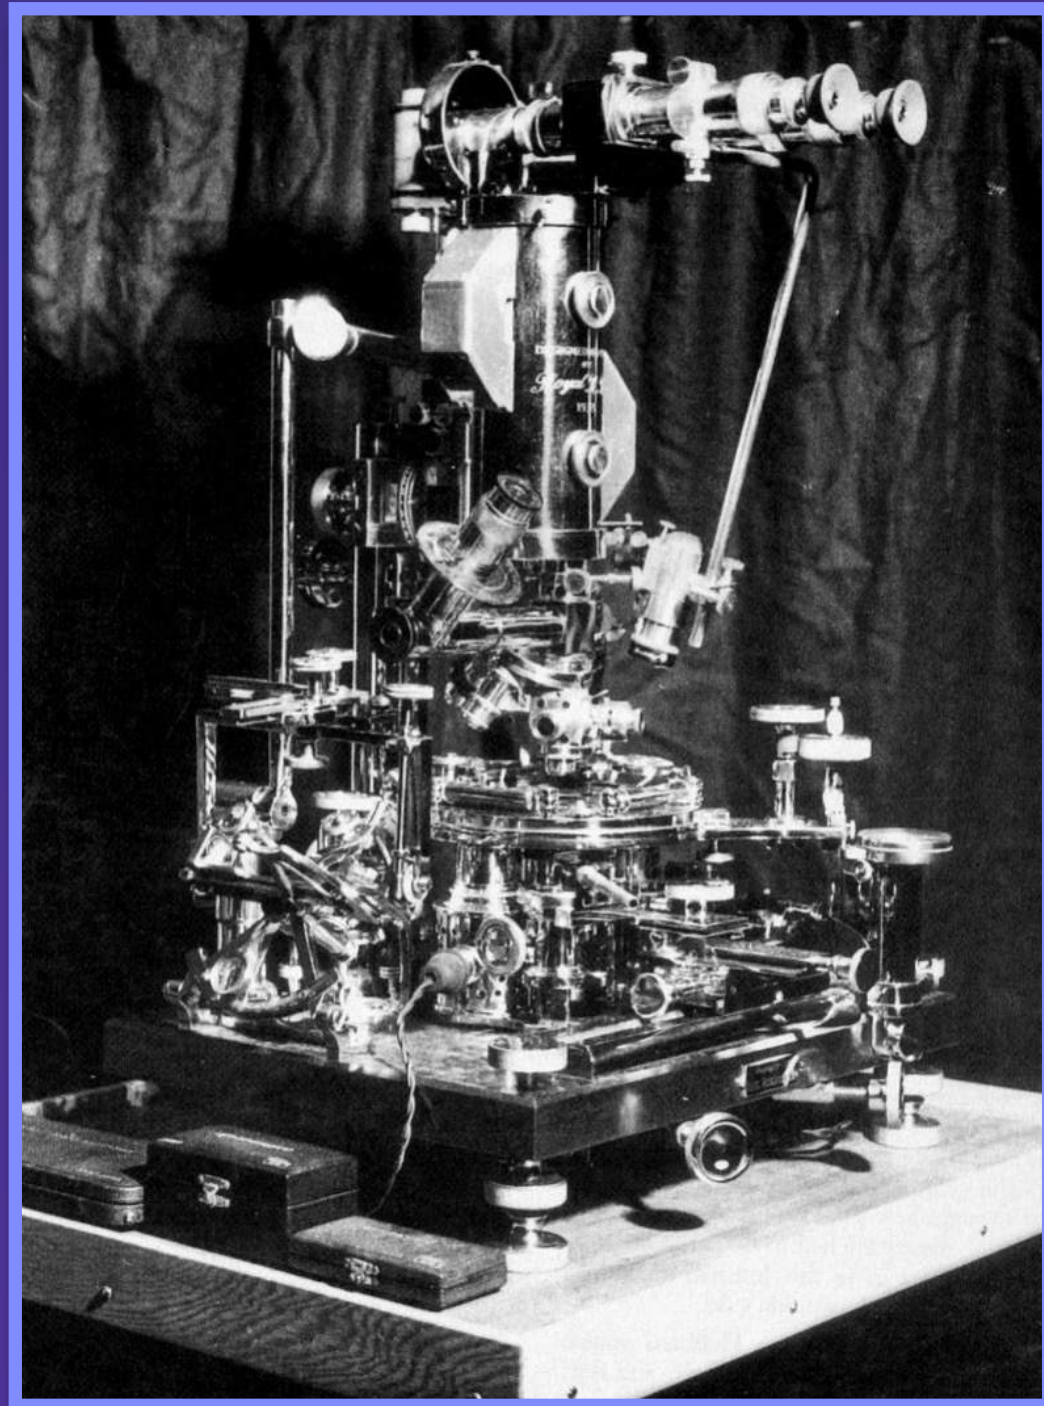

Rife built his research off of studies conducted by a 20th-century scientist, Dr. Albert Abrams, who believed:

All matter vibrates (that vibration is what we call frequency), and vibrations were specific to the type of matter and what it's made of.

Building on Dr. Abrams' research, Dr. Rife theorized that cancer cells and pathogens could be targeted by outside electromagnetic frequencies (EMFs). Then, the cells would undergo apoptosis (cell death, where it will either implode or explode). This was the genesis of the rife machine, a tool that matches the specific frequency of different cancer cells and pathogens delivering low-energy electromagnetic waves to the body.

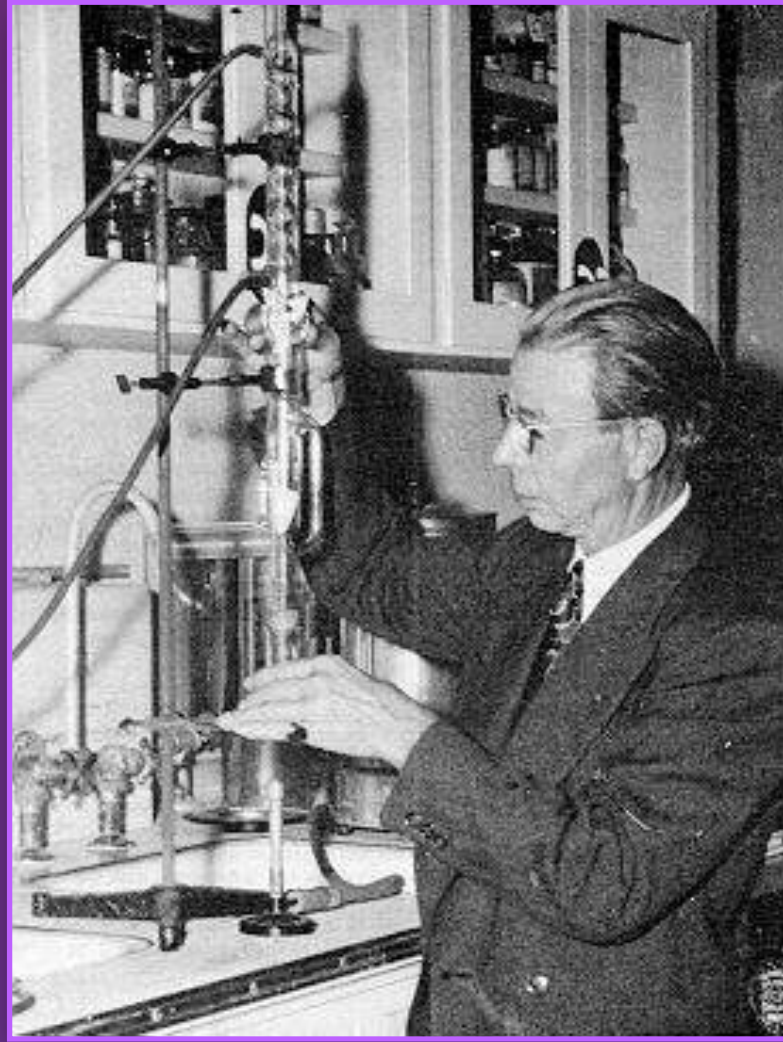

Science of Frequencies in Healing

In the 1920s and '30s, Dr. Royal Raymond Rife—a bacteriologist studying at John Hopkins University—observed that viruses, bacteria, and cancer cells had their own resonance frequencies.

Rife Universal Light microscope was used to determine the mortal oscillatory frequency that destroyed pathogens. By subjecting the pathogen with the same frequency that it vibrated, Rife was able to explode it without harming any surrounding cells.

Treatment with the frequency instrument causes no tissue to be destroyed and no pain is felt. The virus or bacteria is destroyed and the body then recovers itself naturally from the toxic effect of the virus or bacteria.

Science of Frequencies in Healing

In 1934, Dr. Rife conducted experiments on 16 terminal cancer patients. His rife machine cured 14 of the 16 patients in 130 days, and the other two patients were reported to be cured in six weeks.

Chronic Post-Extraction Pain

Melissa P. suffered searing pain in the maxillary left third molar extraction site for one year following removal of her third molar. No one made the diagnosis of shingles! Two months prior to the extraction Melissa had an out break of shingles on her back. Non one connected the dots.

Virtual Injection

Dale B. presented with the chief complaint of pain in a post-root canal extraction site and swollen lymph nodes under her mandible on the left side. Dx revealed CMV in the alveolar bone and submandibular lymph nodes. One minute following the infrared laser pulsing through Cat's Claw homeopathic (Energtix) remedy the patient reported that her pain totally resolved and she felt more clear headed.

Virtual Injection

Within one minute following the virtual injections, Dale stated that her jawbone pain disappeared and that she felt more clear headed and could see more clearly.

Virtual Injection

With the increase of dementia and other neurological maladies, new technology is required to address these issues. Defining the “splinters” in the brain and erasing the toxic frequencies by means of pulsed infrared laser, is one noninvasive way of treating these abnormalities.

BIOPHOTON PEN SYSTEM

The Biophoton Pen System has four frequencies. Two are designed to heal the DNA; one is a general detox frequency, and the fourth is a general healing frequency.

BIOPHOTON PEN SYSTEM

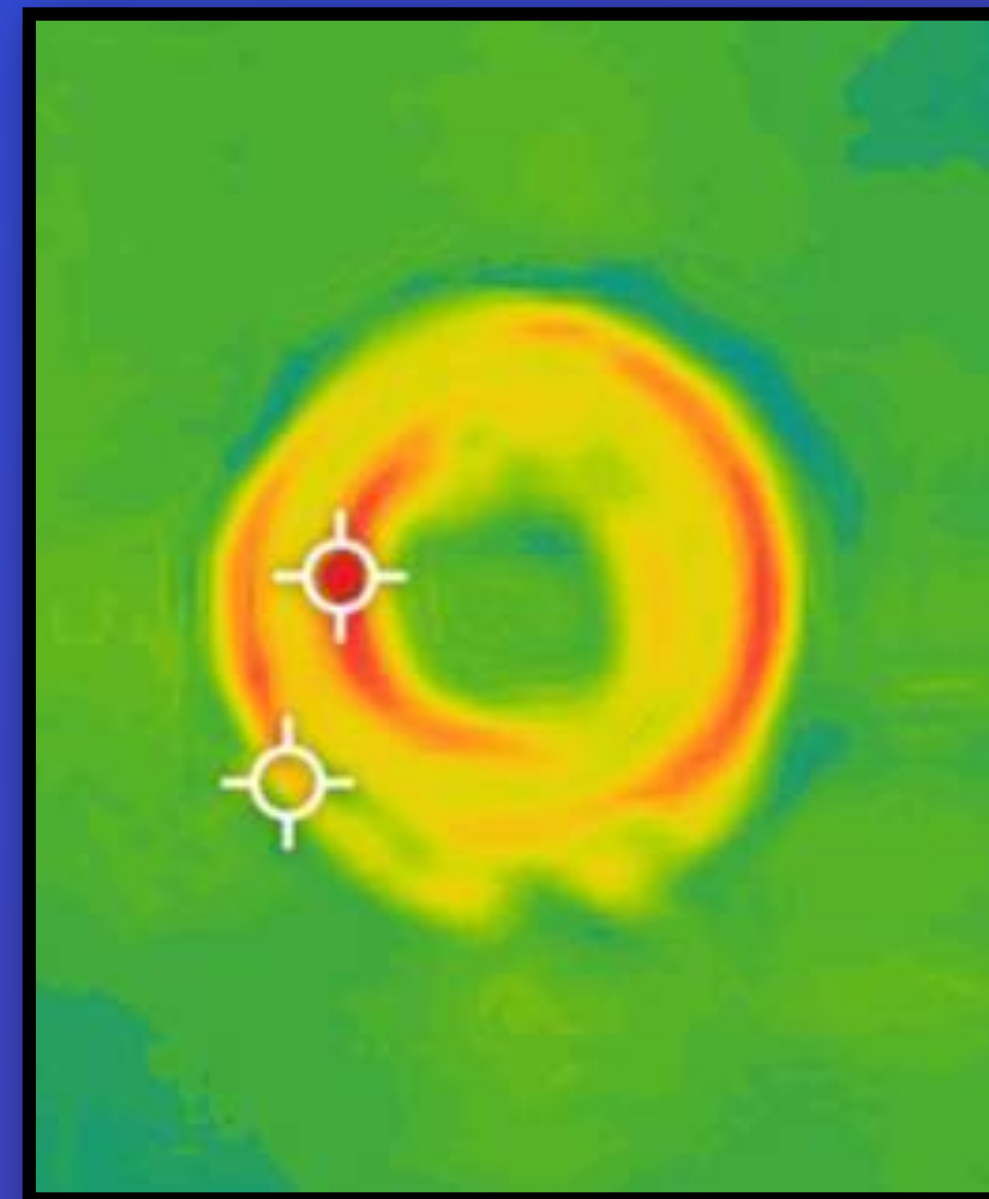

Initial clinical research by Dr. Ngui has shown that 10 Hz allows the light to be absorbed more easily.

Dr. Ngui also discovered that a duty cycle of 60% was more physiologic and absorbed more easily.

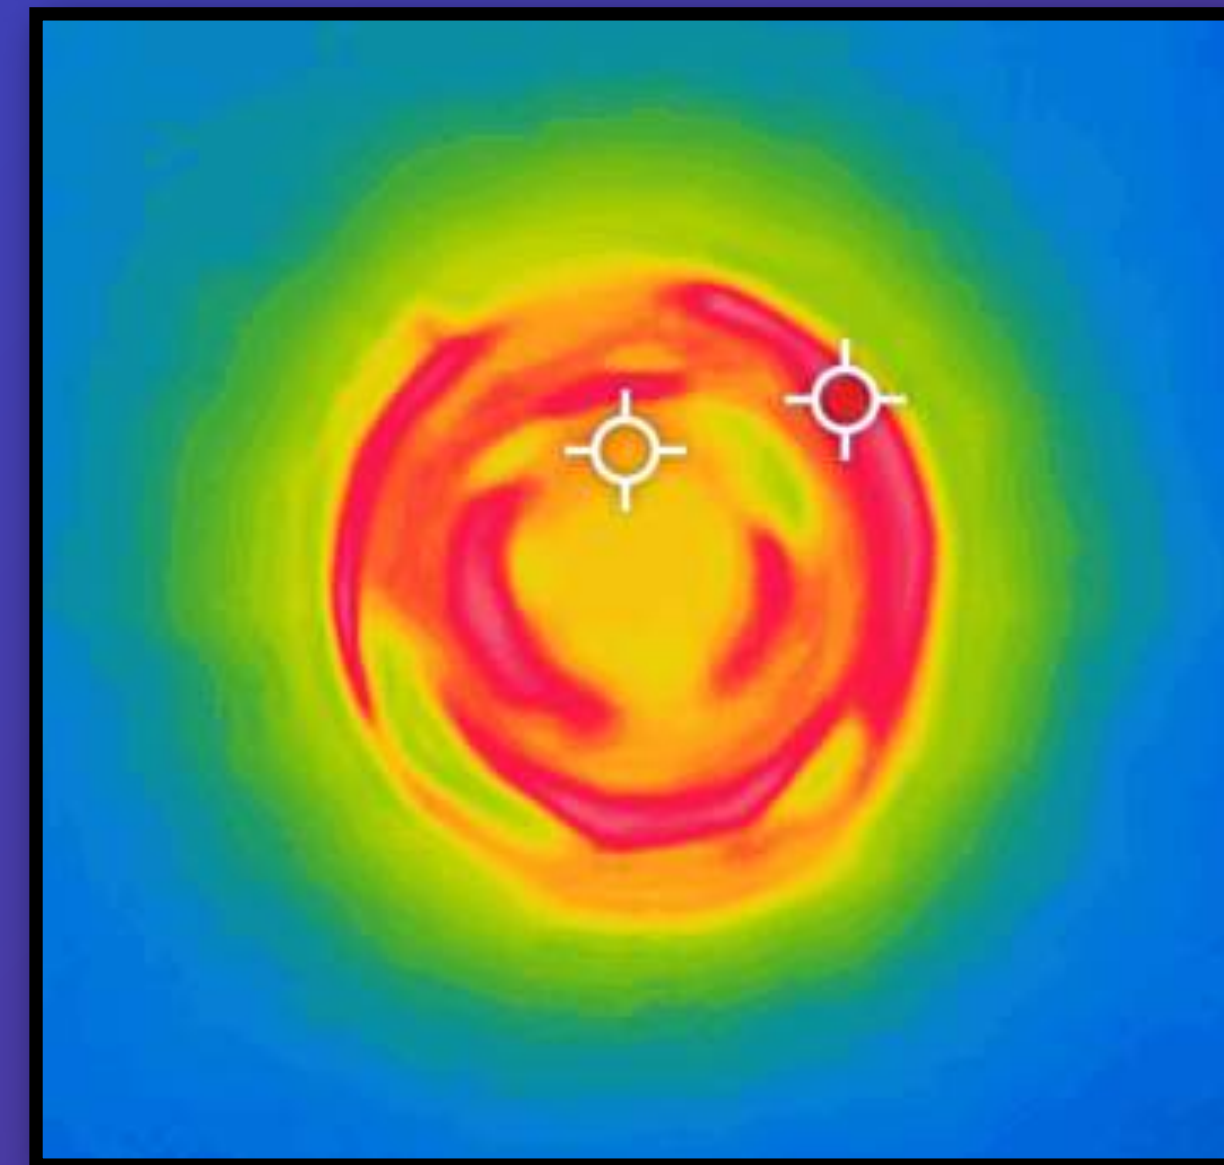

The Biophoton Pen System has a computer enabling the practitioner to change the frequency of the pulsations and also the duty cycle.

Science of Frequencies in Healing

Based on the research of Vlail Kaznachejev, Dr. Royal Ramond Rife, Fritz Albert Popp, Dr. Bruce Lipton's Biology of belief and others, the Tesla Energy Card[®] was born.

The advantage of the Tesla Energy Card[®] is that it provides an affordable way to program specific frequencies to retune any dysfunctional cell, tissues or organs.

What is the Tesla Energy Card®?

The Tesla Energy Card® is a credit card sized device that has a magnetic strip on the backside. Through a sophisticated electronic process, specific healing frequencies can be programmed into the strip. The imprinted frequencies will last for one to two years provided the card is not directly exposed to a cell phone for 5 to 10 minutes or exposed to a strong magnet. In reality the Tesla Energy Card® is a unique delivery system for healing the body.

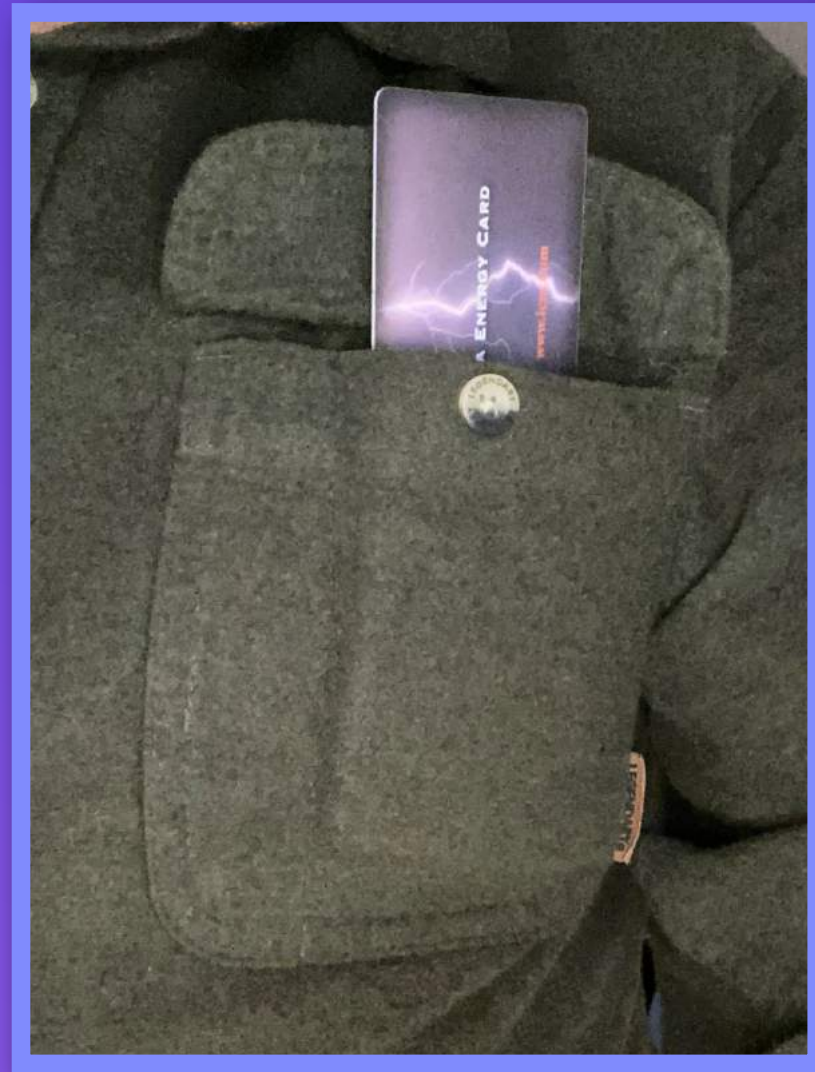

How Does it Work?

There are two primary ways to transmit the frequencies into the body:

1. Wear the Tesla Energy Card[®] with the magnetic strip facing your body. The body's aura, which is an extension of the autonomic nervous system, picks up the frequencies and transfers them into your body.
2. Imprint a glass or bottle of water by placing the glass or bottle directly on the magnetic strip of the Tesla Energy Card[®]. Imprinting takes fifteen seconds to three minutes.

BIOPHOTONS

Basis of Life

Research by Fritz Albert Popp, Ph.D documented the presence of biophotons in human cells and living plants. Consuming raw foods, food based supplements and homeopathic remedies helps restore the cell's energy. Raising the level of energy within cells restores normal physiology and health.

BIOPHOTONS

Biophoton emission is a general phenomenon of living systems. It concerns low luminescence from a few up to some hundred photons per second per square centimeter surface area. At least within the spectral region from 200 to 800nm. The experimental results indicate that biophotons originate from a coherent photon field within the living organism, its function being intra and inter cellular regulation and communication.

SYNERGISTIC FACTORS

Food Based Supplements

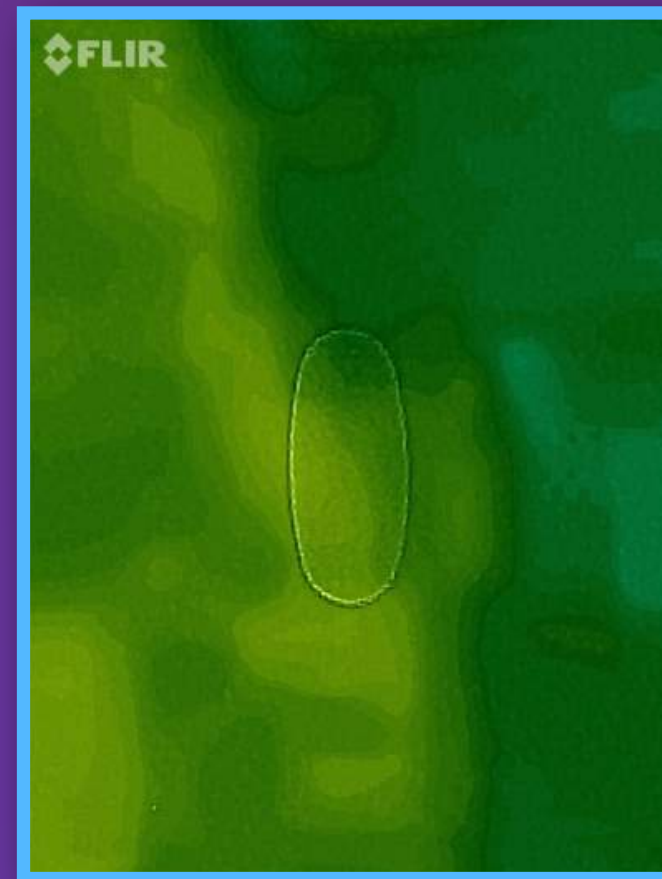

Food and food based supplements provide the matrix for carrying biophotons, frequencies, and synergistic factors (electromagnetic or unknown forms) that we do not even know exist.

SYNTHETIC VITAMINS

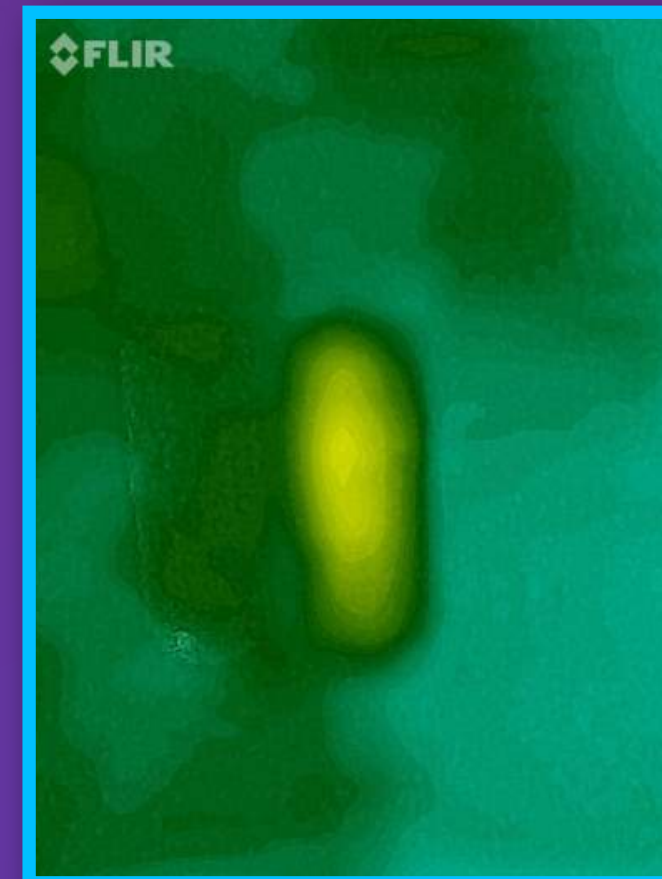

Hampers Healing

Research by Fritz Albert Popp, Ph.D documented that synthetic vitamins lack biophotons. Synthetic vitamins are chemical agents that work pharmacologically. Examples: High doses of vitamin C works like an anti-histamine.

Dangers of Synthetic B Vitamins

A study by Dr. Barnett Sure in which he fed a group of pigs twice the daily requirement of synthetic B1 [Thiamin Hydrochloride]. A like number of pigs were given the same amount of natural B1. The results:

- All of the first generation offspring fed the synthetic vitamin were sterile.
- None of the first generation offspring were sterile from the parents fed natural B1.

Obviously, synthetic B1 is not only not a “nutrient”, it is a genetic poison that damages the chromosome packages responsible for transmitting sexual characteristics from the parent to the offspring. In the case of Dr. Sure’s pigs, the first generation offspring reaped the toxic, genetic damage. In the case of humans, more than one generation is required.

**How to Quickly
Recognize
Synthetic Vitamins**

	Synthetic Source	Where it's from...	Natural Sources
Vitamin A	Vitamin A Palmitate, Retinyl Acetate or Vitamin A Acetate	Methanol, Benzene & Petroleum Esters.	Fish Oils, Carrots, Lemon Grass, D. Salina Algae, Spinach 
Beta Carotene	Unless whole-food source listed, all are synthetic.	Benzene (crude oil) extracted from Acetylene gas.	Carrots, Sweet Potatoes, D. Salina Algae, Spinach 
Vitamin B1	Thiamine Mononitrate, Thiamine Hydrochloride or Thiamin Chloride	Coal Tar derivatives and Ammonia.	Rice Bran, Barley Grass, Peas, Nuts Avocados, Brewers Yeast, Legumes 
Vitamin B2	Riboflavin	Extracted from waste corn with 2N Acetic Acid and Methanol.	Rice Bran, Barley Grass, Molasses, Mushrooms 
Vitamin B3	Niacin or Niacinamide	Coal Tar derivatives, Ammonia, Formaldehyde	Rice Bran, Broccoli, Brewers Yeast, Mushrooms 
Pantothenic Acid (B-5)	Calcium Pantothenate or Panthenol	Propene with Formaldehyde.	Broccoli, Rice Bran, Molasses, Fermented Soy Complex 
Vitamin B6	Pryidoxine Hydrochloride (HCL)	Petroleum Ester & Hydrochloric Acid with Formaldehyde.	Rice Bran, Brewers Yeast, Beets, Molasses 
Biotin (B-7)	D-Biotin. Unless stated, it is all synthetic.	Fumaric acid (decaying plant matter) extracted using Benzene.	Liver, Swiss Chard, Peanuts 
Folic Acid (B-9)	Unless stated, it is all synthetic.	Petroleum derivatives, solvents and Acetylene.	Spinach, Rice Bran, Broccoli, Brewers Yeast 
Vitamin B12	Cobalamin or Cyanocobalamin	Activated Charcoal reacted with Cyanide.	Rice Bran, Brewers Yeast, Liver, Molasses
Vitamin C	Ascorbic Acid	Fermented Corn, Hydrochloric Acid and Acetone.	Acerola, Rose Hips, Citrus Fruits, Blackberries
Vitamin D	Cholecalciferol	Irradiated sheep's wool (lanolin).	Fish Oil, Omega-3's, Mushrooms
Vitamin E	d-Alpha Tocopherol Acetate, Tocopheryl Acetate, Alphatocopherol	Phenols (plastics) from Petroleum waste, treated with Acetone (nail polish remover).	Rice Bran Oils, Spinach, Nuts
Vitamin K	Menadione, Phytonadione, Naphtoquinone	Coal Tar derivative produced with heavy metals and solvents.	Barley Grass, Natto, Spinach, Broccoli

Why the need for nutritional support

During Orthopedic/Orthodontic
Treatment

COMMON DENTAL ISSUES DURING ORTHODONTIC TREATMENT

Periodontal Infections

Increase consumption of green leafy vegetables (kale, collard greens, celery, parsley, etc.) to supply the potassium and vitamin A. The potassium buffers the phosphoric acid of the grains and the vitamin A helps the kidneys conserve calcium by synthesizing ammonia to substitute for the calcium in the salts that are being eliminated.

Perio patients **MUST** reduce, sodas, cereals, and grains in their diets!

If the patient will not eat greens, suggest the product Pure Synergy.

Parent Essential Oils

- Parent Essential Oils are whole forms of the essential oil as it occurs in nature before it is broken down or built up into other biochemical substances, which are called derivatives.

Parent Essential Oils vs Derivatives

- Plant based oils (Parent Essential Oils) provide the building blocks to enable the body to manufacture the essential fatty acids in the amounts it needs including DHA (docosahexaenoic acid) and EPA (eicosapentaenoic acid).
- Once Parent Essential Oils are consumed, your body changes about 5% into other biochemicals called “derivatives” while leaving the remaining 95% in the parent form.
