**Defining the Initiating Factors**

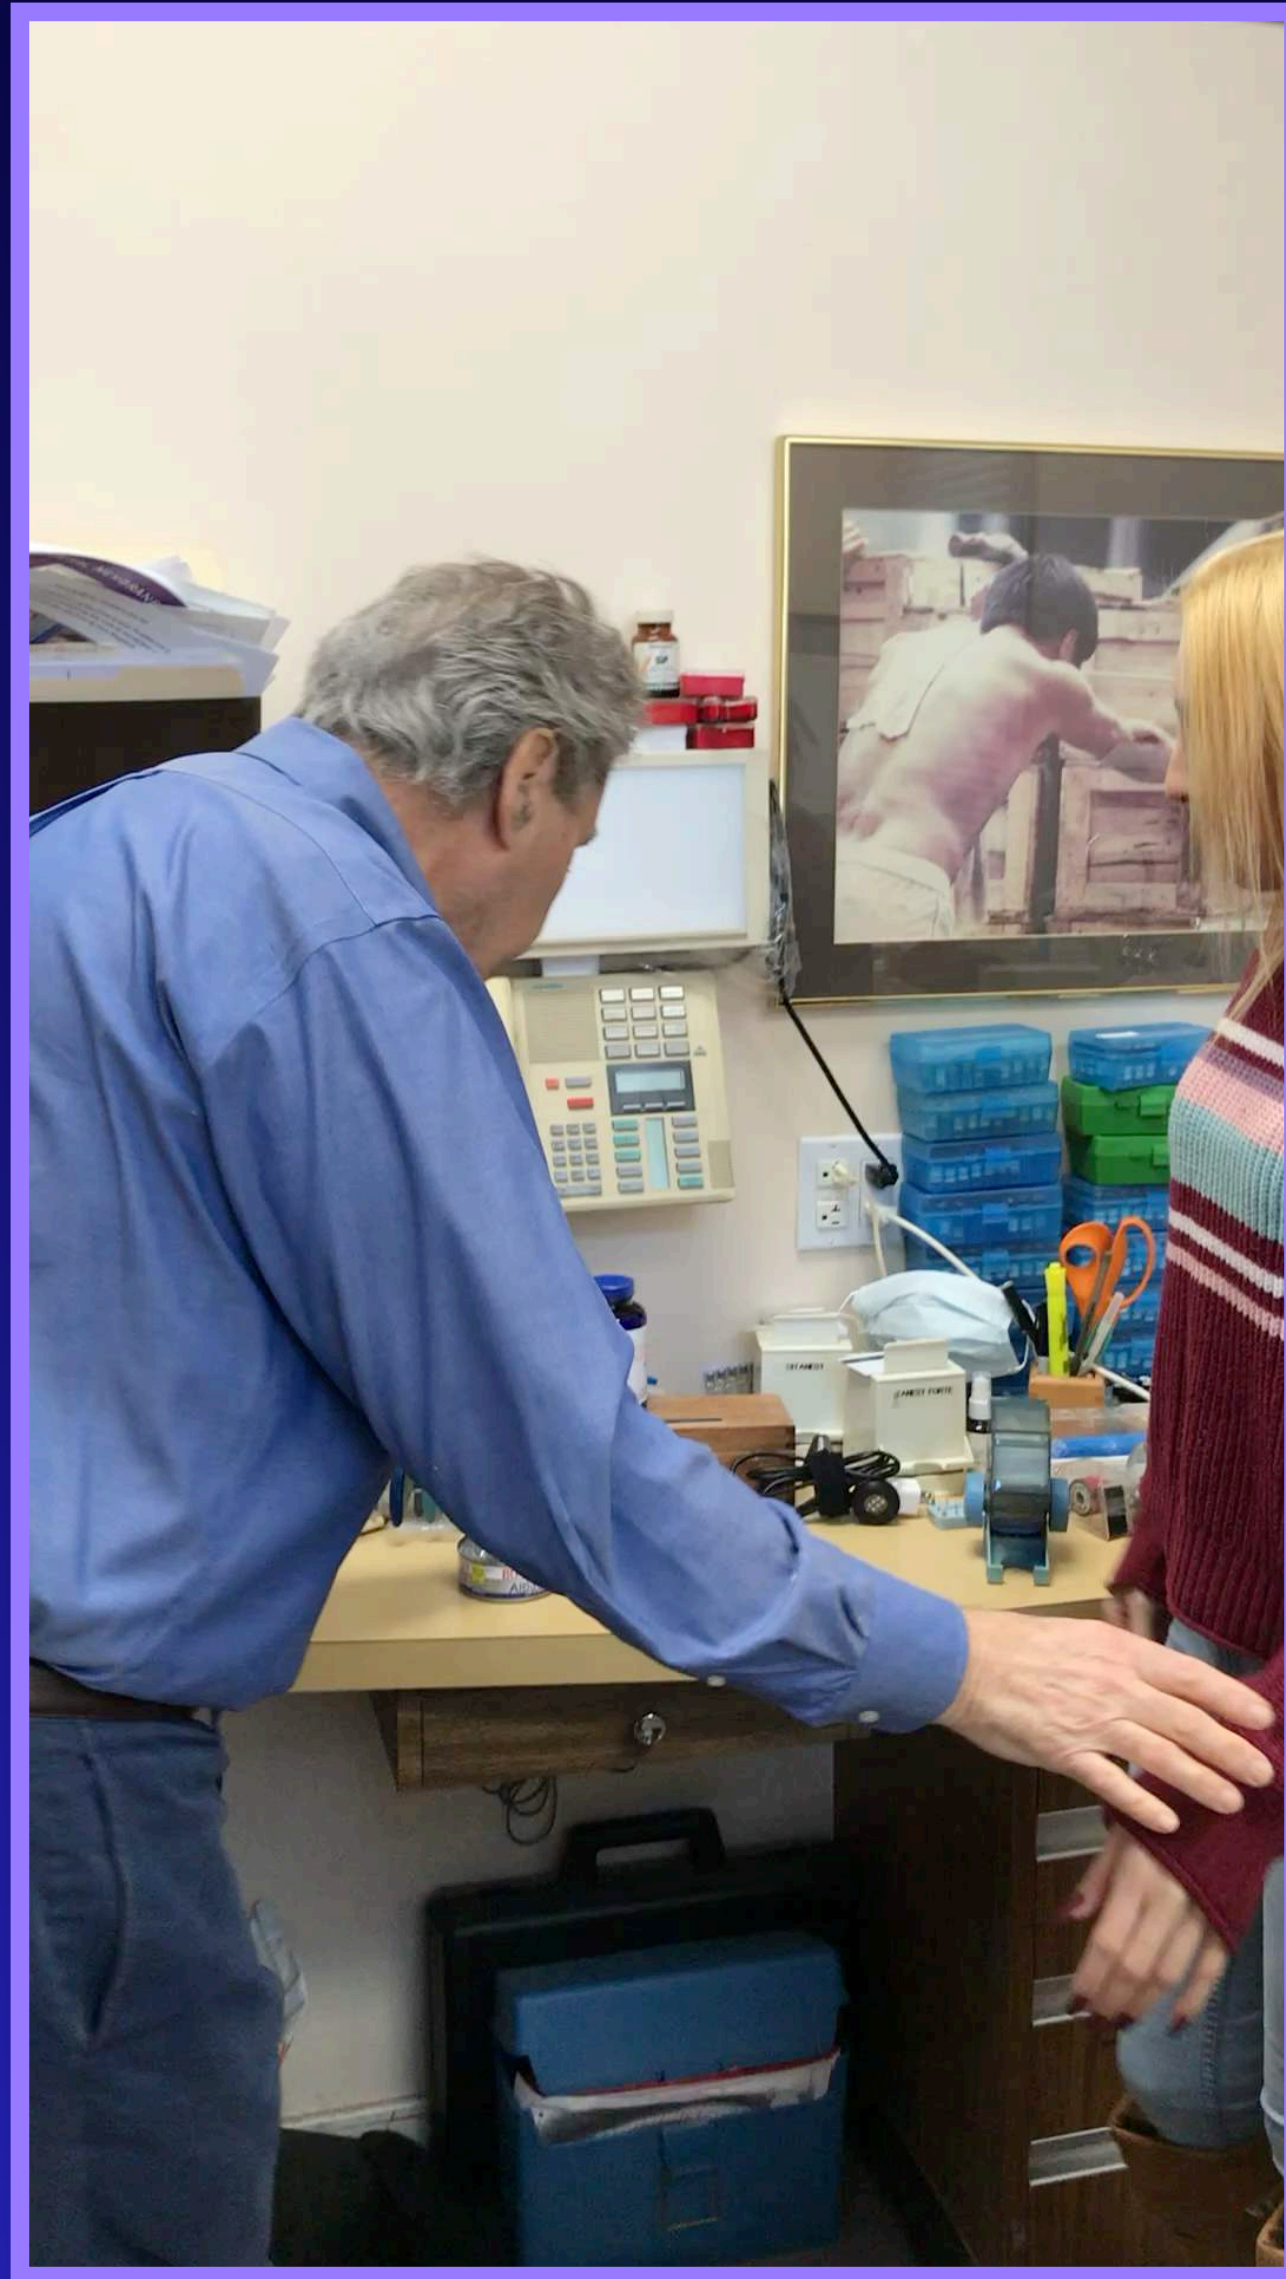

**Quantum Testing is more accurate than blood tests.**

# Quantum Testing Technique

By holding vials of known substances over an area of the body, and muscle testing, the practitioner can diagnose the exact initiator that is causing the patient's symptoms.

# Practical Application of the Quantum Testing Technique

One can test packaged foods for mercury or other contaminants. By placing a vial with a known toxin, the tester can determine if the toxin is present within the package. If a strong arm goes weak when holding the vial of mercury over a can of tunafish, then there is mercury present in the tuna. By placing the Tesla Energy Card® under the can of tuna for several minutes, the toxic frequencies can be neutralized and eliminate the harmful effects of the mercury.

# Vaccine Induced Seizures

CHOP had baby Levi on steroids for seizures.

## **Dx**

Viral meningococcal infection in the left side of the brain along with thimerosal (ethyl mercury), glyphosate (herbicide Round-Up) cadmium, aluminum, and lead. A nutritional program was prescribed and tested for compatibility. Within six weeks the child's seizures resolved and he became the loving interactive child he was suppose to be.

# Canine Seizures

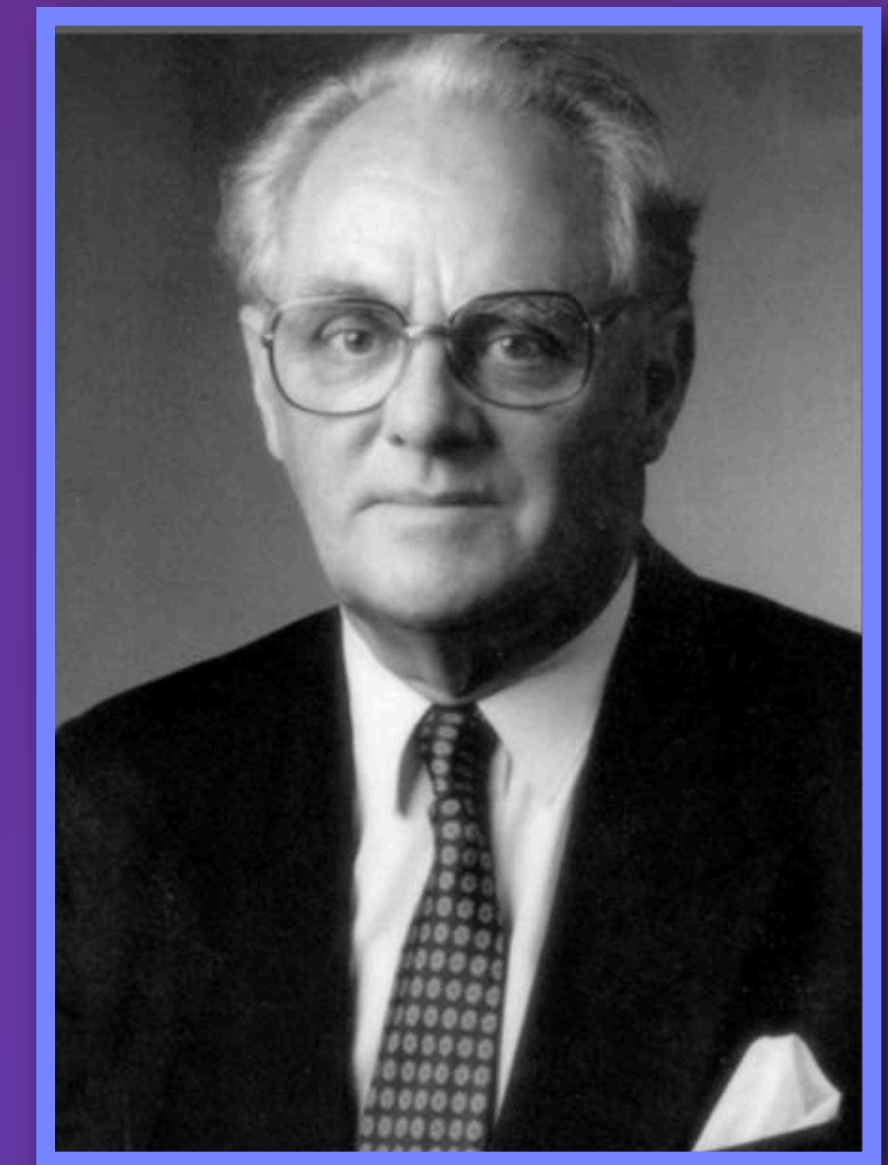

Winchester, a 3.5 year-old Beagle, suffered from frequent seizures. All conventional veterinary testing failed to define the underlying cause. Using Quantum testing techniques, a diagnosis of mercury in his brain was made. Winchester was placed on a homeopathic remedy, Metal-Chord, to remove the mercury. In six weeks Winchester was totally seizure free.

# Dr. Hans Nieper

*In the 1980s, President Ronald Reagan was diagnosed with colon cancer. He could have been treated by the Mayo Clinic, MD Anderson, or Johns Hopkins. Reagan opted for treatment by Dr. Hans Nipper in Germany*

*Dr. Nieper was a medically trained MD and he nalso had a degree in engineering. Dr. Nieper used divining rods to diagnose his patients. As a reward for curing President Reagan, the FDA prevented Dr. Nieper from entering the US for 15 years.*

# Divining Rods

Divining rods are incredibly accurate in diagnosing patient's problems. The concept is based on quantum physics. They assess the energy pattern over an area. When the energy is low, the rods cross; when the area is healthy, they remain parallel. By having the patient hold remedies, the practitioner can assess the treatment.

Dr. Hans Neiper used divining rods in his practice in Germany. In the 1980s, President Ronald Reagan was diagnosed with colon cancer; he flew to Germany for treatment with Dr. Neiper who cured President Raegan. The FDA blocked Dr. Neiper from entering the US for 15 years.

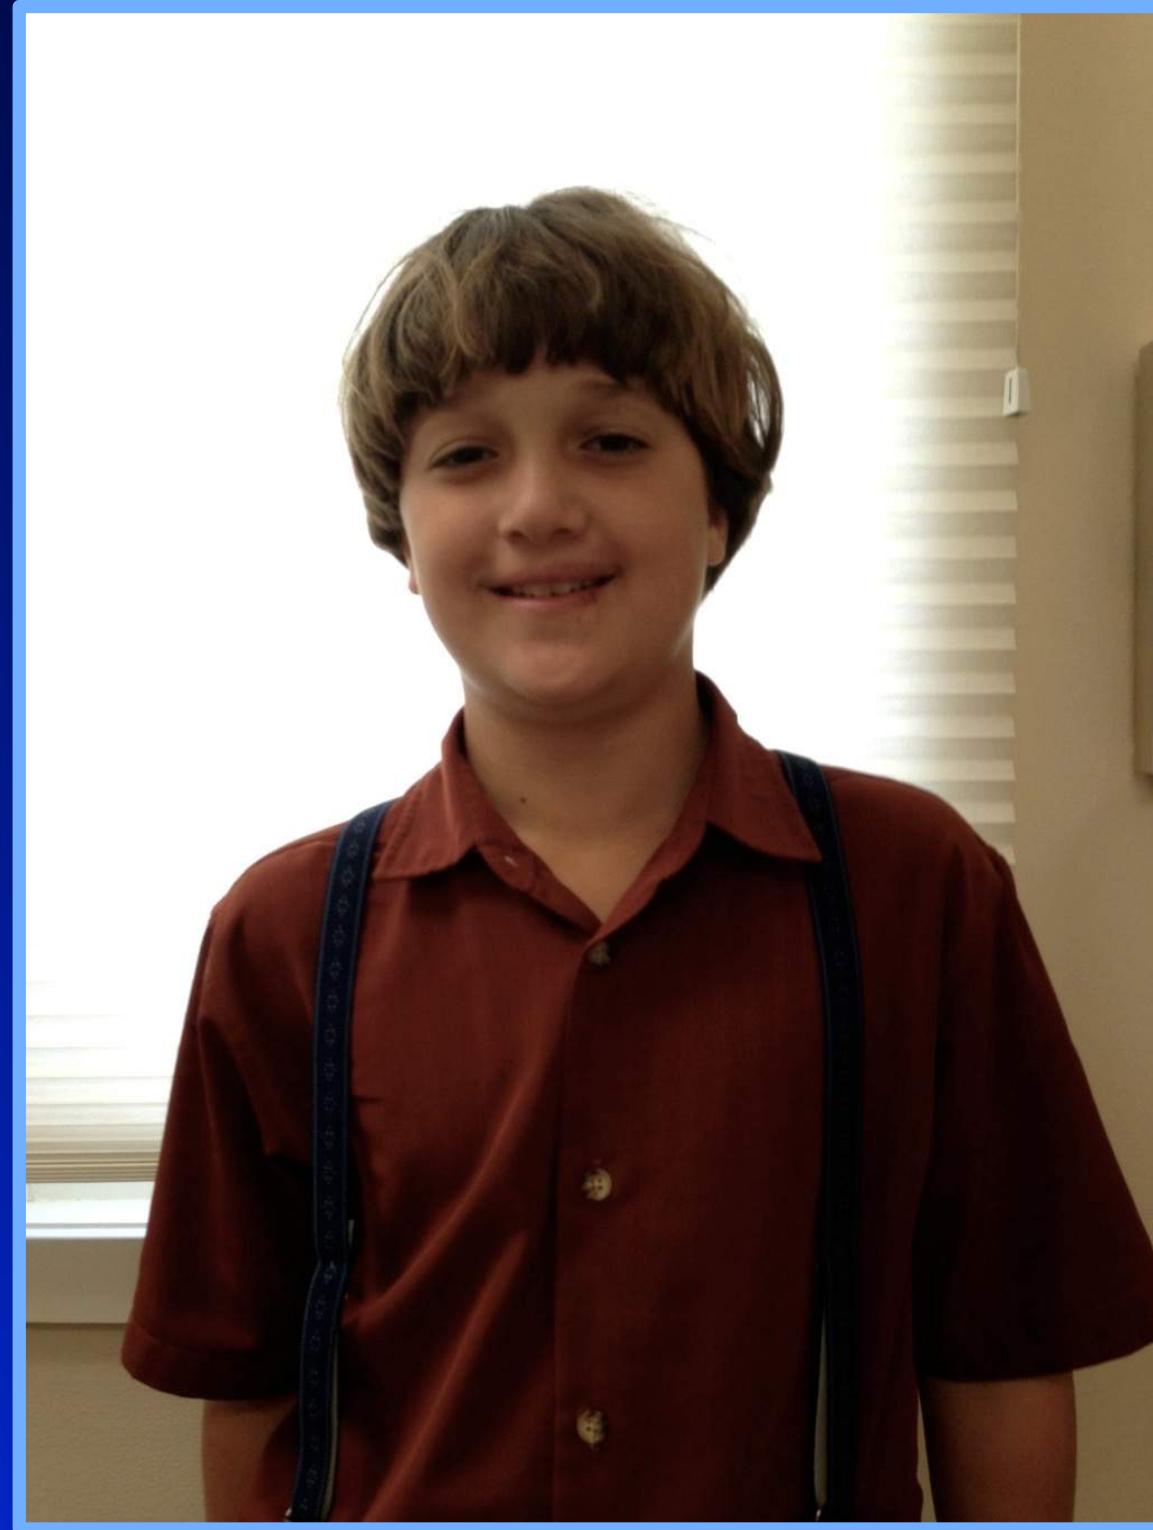

# Defining the “Splinters”

Catlyn suffered severe eczema for seven years. The lesions were painful, itched, and bleed. The dermatologists just treated the symptoms with steroids and told the patient she would have to live with it and that there was no cure.

# TRAPPED VACCINES

Severe Eczema

Mervin was an 11 year-old Amish boy who suffered from severe eczema for several years. All conventional and alternative therapy failed to resolve the lesions. The core issues were never diagnosed:

- Hypothyroidism
- Herpes Zoster
- Herpes Simplex I
- Cytomegalovirus
